

Personal Alarms

Further to recent concerns about safety when going to and from the Boat Club (or anywhere), in the mornings and evenings, we have been looking at personal alarms.

The best ones I've seen are about **£6 each** including p&p (or less, the more we buy) and are aerosol-powered, described below:

"The personal emergency alarm is 10.5cms by 3.5cms in diameter, has a 138 decibel screech, that can be used in single bursts, or, in locked-down mode, continuously for up to 3 minutes. Refills are easily fitted..."

Unfortunately, even with the sensible precautions employed at both Cygnet and BBLRC, there is nothing to stop you being attacked but one of these may give you a chance to get away if you are.

Please let me know if you are interested, I usually order in batches of 5 or so.
Any orders would be treated in confidence.
